

Ceiling Mounted Monorail

Rigid Lifelines™ Ceiling Mounted Monorail fall protection systems provide straightforward rigid track fall protection on a fixed path up to 30° off center, allowing workers the mobility required for vehicle loading/unloading, industrial cleaning and maintenance tasks, and more. These systems are available as individual components, standard assemblies in kit form, or as custom engineered systems tailored to the specific needs of your facility. Because monorail fall protection systems do not require floor space to install support columns, they can easily protect workers in tall ceiling height situations. Rigid Lifelines™ Ceiling Mounted Monorail fall protection systems easily mount to existing structures, and can support long runs and curves within the system design.

[NOTE: Our systems are designed with a maximum worker load of 400lbs (on one person systems) when used with 900lb Maximum Arresting Force self-retracting lanyards and properly rated full body harnesses and connecting hardware. Custom systems are available for multiple workers; please inquire with our sales department for more information.]

Choose the options that meet your needs!

- Monorail systems can be flush mounted parallel or cross-mounted with support steel, or with any length drop rods. Drop rods require sway bracing supplied by others.
- Two-way or three-way switches can be incorporated into the track allowing multiple workers to move in different directions, letting you map fall protection coverage to your specific application.
- Sloped hangers with drop rods can accommodate slopes up to 14° maximum. Sway bracing by others is required.
- Single track, dual track, or multiple tracks let you choose the design that meets your needs.
- Layered primer with single and double enamel coatings, epoxy coatings, and galvanized finish are available to protect our systems from damage and wear.
- Mylar lip seal available for heavy dust or paint overspray applications.
- Available in stainless steel.

Ceiling Monorails are used in a range of industries

- Rail Transportation
- Truck Transportation
- Air Transportation
- Paper Manufacturing
- Petroleum and Coal Products Manufacturing
- Chemical Manufacturing
- Performing Arts and Related Industries
