

Fold-Away Fall Protection Systems

When your workers need overhead fall protection, but your facility usage dictates a movable system, a Rigid Lifelines™ Fold-Away fall protection system is a viable solution. The fold-away design is ideal for facilities where floor space is limited, where workers need protection under large overhead cranes, or maintenance is performed in narrow bays with no workable ceilings. When extended, the system provides workers with a fixed path of rigid track fall protection. When folded away, the system stays out of the way and provides workers access to overhead cranes. These systems are available both as a standard product in kit form and as custom engineered systems.

{NOTE: Our systems are designed with a maximum worker load of 400lbs (on one person systems) when used with 900lb Maximum Arresting Force self-retracting lanyards and properly rated full body harnesses and connecting hardware. Custom systems are available for multiple workers; please inquire with our sales department for more information.}

Fold-Away Fall Protection Systems - The perfect combination of flexibility and reliability!

- Provide fall protection for one or multiple workers
- Reach spans of 40' or beyond
- Span multiple work areas with one fall protection system
- Attach the jib supports to existing columns, or install new supports
- Save space without interfering with an existing overhead crane
- Prevent dirt or dust from interfering with trolley movement by means of an enclosed track design

Choose the Options that Work for You!

- Can optionally lock in positions for either operation or storage
- Fold-away systems can be motorized with electric or with a chain wheel (systems that incorporate more than three jib supports are typically motorized)
- Single track, dual track, or multiple tracks
- Layered primer with single and double enamel coatings, epoxy coatings, and galvanized finish

Fall Protection Solutions for a Range of Industries! Rigid Lifelines™ Fold-Away Fall Protection systems provide space-saving solutions for industries such as:

- Rail transportation
- Truck transportation
- Utilities
- Food manufacturing
- Petroleum and coal products manufacturing
- Plastics and rubber products manufacturing
- Primary and fabricated metal manufacturing
- Machinery manufacturing
- Transportation equipment manufacturing
