

TRAVELING BRIDGE ANCHOR TRACK™ SYSTEM INSPECTION CHECKLIST

Before Each Use

Inspector Name: _____

Date: _____

System Number: _____

Model: _____

Inspect the Traveling Bridge Anchor Track™ System before each use according to this inspection checklist. If the system fails any point on the inspection checklist, remove the system from service and contact Rigid Lifelines.

INSPECTION POINTS	Inspection Result (✓)	
	PASS	FAIL
1. Test the swiveling connector(s) on each trolley to verify that each trolley rotates and swivels freely.		
2. Verify that the trolley(s) can easily and smoothly roll the full length of the bridge(s).		
3. Verify that the end trucks can easily and smoothly roll the full length of the runway tracks.		
4. Verify that the set screws on the fixed end truck are securely tightened.		
5. Check all system welds for cracks.		
6. Check system components for corrosion. Corrosion may not exceed 10 percent of material thickness, including the material thickness (thread height) of bolt threads.		
7. Check system components for bent or damaged areas.		
8. Check support structure for stability.		
9. Visually check all bolted assemblies for proper connections and properly secured bolts and nuts.		
10. Verify that the system is employed in a manner that will not result in off-plumb loadings past runways and bridge end stops.
