ANCHOR TRACK™ FALL PROTECTION

PERMANENT ANCHOR TRACK SYSTEMS

Our permanent fall protection systems can be ceiling mounted, wall mounted, or foundation mounted.

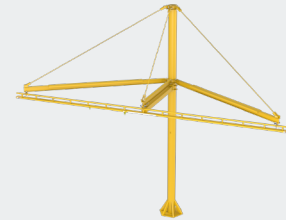

CEILING-MOUNTED MONORAIL

- Requires no floor space for support columns
- Easy installation, even in large buildings with tall ceilings
- Layout flexibility, including curves, slopes, switches, multiple tracks, etc.

INVERTED-U

- Long spans of fall protection coverage in areas without existing structures
- With three or more frames, track lengths are virtually unlimited

POST SUSPENSION

- Space efficient and economical system
- Fall protection coverage to areas where conventional multiple columns cannot be installed

TRAVELING BRIDGE

- Omni-directional, 360-degree user movement and protection
- User can do multiple tasks over a large area without unhooking

FOLD-AWAY

- Ideal for narrow bays with inaccessible ceilings
- Excellent for space-restricted facilities
- Span multiple work areas with one system

INVERTED-L

- Long spans of fall protection coverage in areas without existing structures
- Trolley-hook height starting at 22' allows access to tops of railroad cars, tankers, trailers, outdoor equipment, and systems

T-FRAME

- Long spans of fall protection coverage in areas without existing structures
- Service two lines of vehicles with only one row of columns

COLUMN-MOUNTED SWING ARM

- Minimizes swing fall hazards by constantly positioning trolley over user's head
- Swings out of the way of overhead cranes
- Excellent for small to medium-sized work areas

FREESTANDING SWING ARM

- Provides 360° fall protection coverage area
- Swings out of the way of overhead cranes
- Excellent for small to medium-sized work areas

ANCHOR TRACK™ FALL PROTECTION

MOBILE ANCHOR TRACK SYSTEMS

Our mobile fall protection systems offer convenient mobility and our reliable Anchor Track.

GRIFFIN™ SKIDDED SYSTEM

- Movable in minutes for temporary applications, indoors or outdoors
- Fully assembled system can be lifted with large forklift

GRIFFIN™ WHEELED SYSTEM

- Excellent for temporary applications, indoors or outdoors
- Fully assembled system can be rolled or towed with the proper options

PORTABLE BOX FRAME

- Highly portable fall protection coverage
- Large coverage area
- Able to be moved manually

PORTABLE BASE SWING ARM

- 360° fall protection coverage area
- Swings out of the way of overhead cranes
- Portable system movable by forklift

ROLLING A-FRAME (Fixed or Adjustable Height)

- Highly mobile fall protection coverage
- Provides coverage to virtually every site location

C-FRAME

- Mobile fall protection coverage that can be moved manually
- Ideal for lower headroom applications

ANCHOR TROLLEY™

- Reduces track drifting after a fall event
- Increases the chances for self-rescue
- Comes standard with Anchor Track Systems

ACCESSORIES

SELF-RETRACTING LANYARD

- Meets ANSI Z359.14 standard
- Class 1 SRL

FULL-BODY HARNESS

- Quick-Connect chest and leg buckles
- Dual fall indicators on shoulder straps
- Two lanyard keepers for proper stowing
